

ROLES, DUTIES & RESPONSIBILITIES

Every position in Best Gas Finance — duties, delegated authority, segregation boundaries, required qualifications, and the monthly and annual KPIs each role is measured and reviewed against. The Policy Manual says **what** must be true and the SOP Manual says **how**; this manual says **who**.

DOCUMENT BG-FIN-ORG-001	VERSION 1.0 — Draft for approval	EFFECTIVE DATE 8 August 2026	ESTABLISHMENT 14 charters, grades S1 to EX
OWNER Chief Financial Officer	APPROVED BY CFO and Board (with HR)	REVIEW CYCLE Annual, with the DoA	COMPANIONS BG-FIN-POL-001 · BG-FIN-SOP-001

PART I

THE FINANCE ESTABLISHMENT

How the department is structured, how the roles interlock, and how every charter in this manual is read.

R-00

FRAMEWORK

STRUCTURE, GRADES & HOW TO USE THIS MANUAL

This manual defines **every position in Best Gas Finance** - what each role does, what it may authorise, what it is forbidden from doing, what qualifications it requires, how its performance is measured monthly and annually, and what it must check and review. It is the bridge between the Policy Manual (the rules) and the SOP Manual (the tasks): those documents say what must happen; this one says *who*.

◆ POLICY STATEMENT

No person may be appointed to, or act in, a finance position without a charter in this manual. Every charter states a segregation boundary. Where an appointment would breach that boundary, a compensating control must be approved by the CFO under POL-01.3 **before** the appointment takes effect.

0.1 ESTABLISHMENT AND REPORTING LINES

ROLE	CHARTER	REPORTS TO	GRADE	CONTROL LINE
Chief Financial Officer	R-01	CEO / Board	EX	Second line (owner)
Finance Manager (Financial Controller)	R-02	CFO	M3	Second line
Chief Accountant (General Ledger & Costing)	R-03	Finance Manager	M2	Second line
Inventory & Settlement Controller	R-04	Finance Manager	M1	Second line
Fixed Assets Accountant	R-05	Chief Accountant	S2	Second line
Accounts Payable Accountant	R-06	Chief Accountant	S2	Second line
Procurement Officer	R-07	Finance Manager	S3	First line
Receivables & Credit Accountant	R-08	Finance Manager	S3	Second line
Branch Accountant / Cashier	R-09	Finance Manager (functional)	S1	First line
Treasury Officer	R-10	Finance Manager	S3	Second line
Tax & E-Invoicing Accountant	R-11	Finance Manager	S3	Second line
FP&A Analyst	R-12	CFO	S3	Second line
Head of Internal Audit	R-13	Audit Committee (functional), CEO (admin)	M2	Third line
Internal Auditor	R-14	Head of Internal Audit	S2	Third line

▲ THE ONE LINE THAT MUST NEVER MOVE

Internal Audit (R-13, R-14) reports functionally to the **Audit Committee**, never to the CFO. Every other role in this manual sits inside the CFO's line. Placing Internal Audit under Finance would destroy the third line and, with it, any independent assurance over the CFO's own functions (POL-02, POL-36).

0.2 ORGANISATION CHART

Fourteen charters, two of which sit outside the CFO's reporting line. The chart is the fastest way to see the one structural feature that matters most: assurance is not inside the function it assures.

Solid lines are line reporting; dashed lines are functional or administrative only. The accent marks the **third line**: Internal Audit reports functionally to the Audit Committee and only administratively to the CEO, so it can audit the CFO's own functions. Payroll processing sits with HR and systems operation with IT - both outside Finance - but the review, approval, accounting and reconciliation duties over them stay inside the charters above (R-00.6).

0.3 GRADE STRUCTURE

GRADE	BAND	TYPICAL EXPERIENCE	DECISION SCOPE
EX	Executive	15+ years, 5+ at executive level	Sets policy; accountable to the Board
M3	Senior manager	10 - 15 years	Owens a full cycle end to end; approves within delegated limits
M2	Manager	7 - 12 years	Owens a function; supervises professionals

GRADE	BAND	TYPICAL EXPERIENCE	DECISION SCOPE
M1	Assistant manager	5-8 years	Owens a process; supervises officers
S3	Senior officer / specialist	4-7 years	Performs complex work with limited supervision
S2	Officer	2-5 years	Performs defined work; prepares for review
S1	Assistant / cashier	0-3 years	Performs transactional work under supervision

0.4 HOW EACH CHARTER IS STRUCTURED

- 1. Job purpose** - why the role exists, in one statement.
- 2. Role identity** - reporting line, grade, control line, and the delegated authority carried under POL-03.
- 3. Duties and responsibilities** - grouped by the cycle the role serves.
- 4. Authority and segregation** - what the role may approve, and what it must *never* also do. This is the control boundary; it is not negotiable locally.
- 5. Qualifications and competencies** - essential versus preferred, split between credentials, experience and behaviours.
- 6. KPIs** - measured monthly and annually, each with a target and a named data source so the measure cannot be argued about.
- 7. Checks performed and review received** - what the holder must verify, at what frequency, and who reviews them.

◆ KPI DISCIPLINE

Every KPI in this manual has a **source system** named against it. A KPI whose number is produced by the person being measured, from a spreadsheet only they hold, is not a control - it is self-assessment. Where a role must report its own KPI, an independent reviewer is named in the checks table.

0.5 SEGREGATION CONFLICTS ACROSS THE ESTABLISHMENT

The following combinations may never be held by one person, regardless of headcount pressure (POL-11.1). Where a branch is too small to separate them, the compensating controls in POL-11.2 apply and must be documented.

ROLE	MAY NEVER ALSO PERFORM
R-06 Accounts Payable	Vendor master maintenance; payment release; bank signatory; goods receipt

ROLE	MAY NEVER ALSO PERFORM
R-07 Procurement	Goods receipt confirmation; invoice approval; vendor bank-detail changes
R-08 Receivables & Credit	Collecting or banking customer cash; approving credit notes, credit limits or write-offs
R-09 Branch Cashier	Posting cash receipts to the ledger; approving deposit refunds; performing the branch stock count alone
R-04 Inventory & Settlement	Custody of cylinder stock or van cash; approving any write-off (recommends only); signing a count as sole approver
R-10 Treasury	Preparing the payment batch they release; maintaining vendor bank details; reconciling an account they release from
R-11 Tax & E-Invoicing	Filing without independent review and CFO approval; conceding a ZATCA position alone
R-03 Chief Accountant	Approving their own manual journals; approving their own standard cost revisions
R-13 / R-14 Internal Audit	Any operational finance duty; auditing an activity they ran within 12 months

0.6 CROSS-FUNCTION CONTROL BOUNDARIES

Several controls deliberately run *across* charters, and in two cases across functions outside Finance. These boundaries are part of the control design and may not be collapsed for convenience, however small the team.

CYCLE	PREPARED BY	APPROVED BY	RECORDED / RELEASED BY
Payroll	Human Resources - master data, processing, WPS, GOSI	R-02 Finance Manager, after independent variance review	R-03 Chief Accountant records; R-10 Treasury releases the file
System access & change	Information Technology - provisioning, change control, backups	System owner, on a documented request	R-02 Finance Manager reviews access against the segregation matrix and reconciles the DoA quarterly
E-invoicing	R-11 Tax & E-Invoicing resolves clearance rejections	-	R-03 Chief Accountant independently reviews the monthly completeness reconciliation
Inventory & van write-offs	R-04 Inventory & Settlement Controller investigates and recommends	R-02 Finance Manager, at any value	R-03 Chief Accountant
Credit	R-08 Receivables & Credit assesses and recommends	R-02 Finance Manager grants limits, releases suspensions	R-08 Receivables & Credit

✖ THE THREE RULES THESE BOUNDARIES EXIST TO ENFORCE

No single function may create an employee, pay them and record the cost. The role that investigates a variance may never be the role that approves writing it off. The role that resolves a clearance rejection may never be the only role certifying that nothing was missed.

Where a location is too small to separate these duties, the compensating controls in POL-11.2 apply and must be documented and approved by the CFO under POL-01.3 before the arrangement takes effect.

FINANCE LEADERSHIP

The two roles accountable for the integrity of everything below them.

R-01

LEADERSHIP

CHIEF FINANCIAL OFFICER

Accountable to the Board for the financial integrity, solvency and regulatory compliance of Best Gas. The CFO owns the Policy Manual, the accounting judgements, the capital structure and the credibility of every number the company publishes.

REPORTS TO CEO, with direct access to the Board and Audit Committee	DIRECT REPORTS Finance Manager, FP&A Analyst
CONTROL LINE Second line - owner of the framework	DELEGATED AUTHORITY Opex to SAR 1,000,000; capex to SAR 1,000,000; waivers to SAR 100,000

1.1 DUTIES & RESPONSIBILITIES

- **Governance.** Owns and annually re-issues the Finance Policy Manual, the SOP Manual and this Roles Manual; recommends the Delegation of Authority to the Board; ensures every finance position is filled by a competent holder with a current charter.
- **Financial reporting.** Accountable for financial statements that comply with SOCPA-endorsed IFRS; approves the judgements register (POL-04.2), including the cylinder-as-inventory classification, ECL rates and capitalised app development lives; signs the representation letter to the external auditor.
- **Solvency and capital.** Maintains the liquidity floor under POL-30; recommends borrowing, guarantees and capital structure to the Board; owns covenant compliance and forecasts breaches before they occur.
- **Margin stewardship.** Owns the commodity margin question that defines this business - feedstock cost rising monthly against regulated or slow-moving selling prices - and escalates to the Board when gross margin approaches the approved floor.

- **Internal control.** Accountable for a control environment satisfying all seventeen COSO principles; approves compensating controls where segregation is impractical; owns the deficiency register and its remediation.
- **Tax and regulatory.** Approves the tax posture (low risk, POL-33); approves all returns before submission; is the single point of contact for ZATCA correspondence and settlements.
- **Risk.** Owns the financial risk register; ensures re-assessment on every trigger in POL-12.3; ensures insurance is adequate to survive the largest foreseeable single loss.
- **Ethics.** Sets the tone from the top; ensures the whistleblowing channel bypasses management; ensures no one is pressured to record a transaction they believe is wrong.
- **People.** Builds the finance talent pipeline, approves qualifications for each charter, ensures CPD is completed, and conducts succession planning for every M-grade role.
- **Business partnering.** Challenges commercial proposals with evidence; approves pricing and credit frameworks; sponsors the Souq Gas financial roadmap.

1.2 AUTHORITY & SEGREGATION

✗ THE CFO MUST NEVER

Act as a bank signatory releasing a batch they approved; override a control without a documented waiver; direct or edit an Internal Audit finding; approve a related-party transaction (Board reserved); or be the sole reviewer of their own judgements - the Audit Committee and the external auditor exist precisely to test them.

1.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Accounting, Finance or Economics	MBA or Master's in Finance
Certification	SOCPA, CPA, ACCA or CA - fully qualified and in good standing	CMA or CTP in addition
Experience	15+ years in finance, 5+ as CFO or Financial Controller of a multi-site operation	Distribution, downstream energy, LPG or FMCG with a returnable-container model
Technical	IFRS; Saudi Zakat, VAT and e-invoicing; treasury; inventory-intensive costing; COSO	Prior audit-committee exposure; post-ERP-implementation leadership

DIMENSION	ESSENTIAL	PREFERRED
Systems	ERP at group level; advanced financial modelling	Experience integrating a customer-facing app to an ERP
Language	Fluent Arabic and English - Arabic is required for statutory books and ZATCA	-
Behavioural	Independence of mind under commercial pressure; the standing to say no to the CEO; clarity with non-financial audiences	-

1.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Close completed and trial balance locked	Working day 5, 12 of 12 months	Monthly	Close checklist sign-off
Liquidity headroom vs. the 3-month floor	Never breached	Monthly	13-week forecast vs. bank
Gross margin by channel vs. Board floor	At or above floor	Monthly	Management pack
Statutory filings made on time (VAT, WPS, GOSI, Zakat)	100%	Monthly	Compliance calendar
Open material weaknesses	Zero	Monthly	Deficiency register
External audit opinion	Unqualified, no material adjustments	Annual	Auditor's report
Prior-period errors requiring restatement	Zero	Annual	IAS 8 register
EBITDA and free cash flow vs. Board budget	Within 5%	Annual	Audited accounts
High-severity audit findings closed within agreed date	100%	Annual	Internal Audit tracker
Finance key-role succession cover identified	100% of M grades	Annual	Succession plan

1.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	THE CFO CHECKS	THE CFO IS REVIEWED BY
Daily	Cash position and any escalation above delegated limits	-
Monthly	Management pack; deficiency register; waiver register; margin by channel; deposit liability movement	CEO - performance review of the month
Quarterly	Covenant compliance; risk register; DoA reconciliation; related-party listing	Audit Committee - control and compliance report
Annually	Policy manual re-issue; judgements register; insurance adequacy; materiality; succession	Board - formal appraisal; external auditor - management letter

R-02

LEADERSHIP

FINANCE MANAGER (FINANCIAL CONTROLLER)

Runs Finance day to day. Where the CFO owns the framework, the Finance Manager owns its **operation** - that the close lands on time, the reconciliations tie, the controls actually run, and the exceptions get resolved rather than carried forward.

REPORTS TO Chief Financial Officer	DIRECT REPORTS Chief Accountant, Inventory & Settlement Controller, Receivables & Credit, Treasury, Tax, Procurement, Systems
CONTROL LINE Second line	DELEGATED AUTHORITY Opex to SAR 250,000; capex to SAR 100,000; credit limits to SAR 50,000; write-offs to SAR 25,000

2.1 DUTIES & RESPONSIBILITIES

- **Close ownership.** Runs the month-end calendar end to end (SOP-28); enforces cut-off; locks the trial balance on working day 5; signs off that every sub-ledger reconciles to its GL control account to the cent.
- **Reconciliation control.** Maintains the balance sheet reconciliation register with a named owner and frequency per account; reviews completeness monthly; escalates any reconciling item over 30 days old.

- **Journal integrity.** Independently reviews every manual journal above SAR 50,000 and all post-cut-off journals; approves reopening of a closed period only with CFO authority.
- **Variance and exception resolution.** Owns the daily van and branch settlement exceptions (SOP-16), cylinder count variances (SOP-08), and approves write-offs within limit -and refers upward rather than absorbing anything above it.
- **Payment control.** Approves the weekly payment run proposal; ensures maker-checker holds; ensures no payment is released to an account not in the counterparty's name.
- **Team leadership.** Supervises and develops the accounting, credit, treasury, tax and inventory teams; ensures leave cover exists and that mandatory annual leave is actually taken so duties rotate.
- **Payroll approval.** Independently reviews the payroll run prepared by HR -variance analysis against the prior period, leaver removals, bank-detail changes -and approves it for release. Finance does not process payroll, but no payroll leaves the company without this approval (POL-29).
- **Control operation.** Ensures each control in the SOP manual has an owner and evidence of operation; performs the quarterly DoA and user-access reconciliations against the segregation matrix (POL-37) -IT provisions access, Finance reviews it.
- **Audit interface.** Primary contact for external audit fieldwork; owns the prepared-by-client schedule and delivers it complete and on time.
- **Reporting.** Produces the management accounts and variance commentary; ensures the commentary explains causes in operational terms, not restated numbers.

2.2 AUTHORITY & SEGREGATION

✗ THE FINANCE MANAGER MUST NEVER

Post a journal they approve; prepare and release the same payment batch; maintain vendor or payroll master data; hold custody of cash or cylinder stock; or approve a write-off of a variance they personally investigated without a second reviewer.

2.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Accounting or Finance	Master's

DIMENSION	ESSENTIAL	PREFERRED
Certification	SOCPA, CPA, ACCA, CMA or CA -qualified or final stage	Fully qualified with post-qualification experience
Experience	10 -15 years, including 4+ leading a close in a multi-site, inventory-heavy business	LPG, fuel distribution, FMCG or logistics
Technical	IFRS application; perpetual inventory and standard costing; VAT and e-invoicing; reconciliation and control design	IFRS 16, IFRS 9 ECL modelling
Systems	Strong ERP (Nana Financials or equivalent); advanced Excel	Power BI or equivalent; ERP implementation experience
Language	Fluent Arabic and English	-
Behavioural	Holds a deadline without cutting a control; comfortable escalating bad news early	-

2.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Close completed by working day 5	100%	Monthly	Close checklist timestamps
Balance sheet accounts reconciled and signed	100% by working day 4	Monthly	Reconciliation register
Reconciling items older than 30 days	Zero	Monthly	Reconciliation register
Sub-ledger to GL differences at lock	Zero	Monthly	ERP control account report
Manual journals above SAR 50,000 reviewed before posting	100%	Monthly	ERP journal approval log
Payroll runs approved after independent variance review	100%	Monthly	Payroll approval record
Van and branch settlement exceptions cleared within 5 days	> 95%	Monthly	Settlement exception log
Post-close adjustments raised by external audit	Zero material	Annual	Audit adjustment schedule
Audit PBC schedule delivered complete on day one	100%	Annual	Auditor confirmation
Quarterly DoA and access reconciliations completed	4 of 4	Annual	Compliance monitoring log

KPI	TARGET	FREQUENCY	SOURCE
Team turnover in critical control roles	< 15%	Annual	HR records

2.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Daily	Settlement exceptions; payment run releases; bank position	-
Weekly	Payment proposal approval; AP and AR ageing; open variance log	CFO -exception discussion
Monthly	Reconciliation completeness; journal review; inventory variance; close sign-off	CFO -close review meeting
Quarterly	DoA vs. system limits; user access vs. segregation matrix; waiver register	CFO and Internal Audit
Annually	Full physical count sign-off; policy compliance attestation; audit support	CFO appraisal; Internal Audit assurance

ACCOUNTING & CONTROL

The roles that own the ledger, the cost of a filled cylinder, the stock that walks out of the gate, and the assets that stay.

R-03

ACCOUNTING

CHIEF ACCOUNTANT (GENERAL LEDGER & COSTING)

Owens the general ledger and the accuracy of everything posted to it. If a number is wrong, incomplete, in the wrong period or unsupported, this is the role accountable for finding it before anyone outside Finance does.

REPORTS TO Finance Manager	DIRECT REPORTS Fixed Assets Accountant, Accounts Payable Accountant
CONTROL LINE Second line	DELEGATED AUTHORITY Journal approval to SAR 50,000; recommends standard cost revisions. No payment or credit authority

3.1 DUTIES & RESPONSIBILITIES

- **Chart of accounts.** Owns its structure and integrity; approves new accounts; prevents proliferation and enforces the block structure in POL-04; ensures no account is created to hide a difference.
- **Ledger accuracy.** Reviews and approves manual journals within limit; ensures every journal carries support and a business reason; enforces the ban on unexplained balancing entries.
- **Reconciliations.** Prepares or reviews the higher-risk balance sheet reconciliations - deposits held (2210), Souq Gas wallet liability (2211), GRN clearing, suspense and inter-branch - and clears suspense monthly.
- **Accruals and prepayments.** Maintains the accrual schedule; ensures received-not-invoiced goods and services are accrued at cut-off; releases accruals only against actual invoices, never by rolling them forward.
- **Deposit liability.** Owns the reconciliation between the customer deposit register (unit count) and the deposit liability balance (value) - the single control that proves cylinders with customers are properly recorded.

- **Close execution.** Runs the close task list; ensures depreciation, payroll, tax and inventory postings land before lock; produces the draft trial balance for the Finance Manager.
- **Statutory support.** Prepares the financial statement disclosure schedules and the audit PBC pack; maintains records in Arabic as required by the commercial books law.
- **Inventory costing.** Recalculates the weighted-average gas cost monthly from bulk receipts including freight, duty and handling; ensures the monthly contract price change is applied from its *effective* date, not the invoice date.
- **Standard costs.** Maintains cylinder standard costs, reviews them annually and on a material steel-price movement, and recommends revisions to the CFO with the financial effect quantified and applied prospectively as a change in estimate.
- **Absorption and NRV.** Applies fixed overhead on **normal capacity** so a low-volume month cannot inflate stock value; reports under- and over-absorption separately; tests finished stock against net realisable value at least annually and whenever a regulated price change compresses margin.
- **Payroll accounting.** Posts and reconciles the payroll, GOSI and end-of-service journals from the HR-prepared run; maintains the EOSB accrual schedule per employee on current wage and tenure so the provision is never discovered on exit; reconciles the GOSI payable to the authority portal.
- **Interface integrity.** Monitors the daily interfaces from POS, the Souq Gas app and the warehouse system into the GL and runs source-to-GL completeness checks; a dropped interface silently understates revenue, so every failed or partial transfer is investigated the same day with IT.
- **Independent completeness review.** Reviews the Tax & E-Invoicing Accountant's monthly e-invoice completeness reconciliation, so the role that resolves clearance rejections is not the only role certifying that nothing was missed (R-00.5).
- **Supervision.** Reviews the work of Accounts Payable and Fixed Assets before it reaches the Finance Manager - the first line of review, not a pass-through.

3.2 AUTHORITY & SEGREGATION

✗ THE CHIEF ACCOUNTANT MUST NEVER

Approve a journal they posted themselves; maintain vendor, customer or payroll master data; release payments; hold custody of cash or stock; perform the physical count they will later reconcile the ledger to; **approve their own standard cost revision**; or adjust a standard cost to close a variance rather than explain it.

3.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Accounting	Master's in Accounting or Finance
Certification	SOCPA, CPA, ACCA or CMA -part-qualified minimum; costing exposure essential	Fully qualified
Experience	7 -12 years in general ledger and close, 3+ supervising accountants	Multi-site distribution; deposit or returnable-container accounting
Technical	Full-cycle close; IFRS application; reconciliation design; standard costing and variance analysis ; Arabic statutory bookkeeping	Consolidation; IFRS 16
Systems	Strong ERP GL module; advanced Excel (pivot, lookup, reconciliation modelling)	Report writer or BI tool
Language	Fluent Arabic and English	-
Behavioural	Refuses to sign a reconciliation that does not tie; methodical under close pressure	-

3.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Close tasks completed by owner deadline	100%	Monthly	Close checklist
Suspense and clearing accounts at zero at lock	Zero balance	Monthly	Trial balance
Deposit register (units) vs. liability (value) variance	Zero unexplained	Monthly	Deposit reconciliation
Journals posted without support or approval	Zero	Monthly	ERP journal log sample
Accruals released without matching invoice	Zero	Monthly	Accrual schedule
Source-to-GL interface completeness checks passed	100%	Monthly	Interface reconciliation report

KPI	TARGET	FREQUENCY	SOURCE
Payroll, GOSI and EOSB journals reconciled to the HR run	Zero difference	Monthly	Reconciliation register
E-invoice completeness reconciliation independently reviewed	100%	Monthly	Completeness working paper
Reconciliations reviewed before Finance Manager sign-off	100%	Monthly	Reconciliation register
Weighted-average gas cost recalculated and posted	By working day 2	Monthly	Costing run log
Cost variances explained rather than absorbed	100% above SAR 10,000	Monthly	Variance analysis pack
Standard cost review and NRV test completed	Annually, plus on trigger	Annual	Standard cost and NRV working papers
Audit adjustments arising in GL or inventory valuation	Zero material	Annual	Audit adjustment schedule
Disclosure schedules delivered complete on day one	100%	Annual	Auditor confirmation
Internal Audit findings in GL scope	Zero high severity	Annual	Audit report

3.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Daily	Journal queue; interface error log from POS, Souq Gas and the warehouse system	-
Weekly	Suspense movement; accrual additions; team output quality review	Finance Manager
Monthly	Deposit reconciliation; higher-risk balance sheet accounts; close pack	Finance Manager -reconciliation sign-off
Annually	Chart of accounts review; disclosure schedules; audit support	Finance Manager appraisal; external audit testing

 HIGHEST-EXPOSURE CONTROL ROLE

Owens the count, the register and the reconciliation of an asset base that is scattered across plants, warehouses, hundreds of vans and thousands of customer homes. This role answers, on any given day, **where every cylinder is** - and it is the earliest warning system the company has for theft and unrecorded loss.

REPORTS TO Finance Manager	DIRECT REPORTS Count teams (functional), branch stock clerks (functional)
CONTROL LINE Second line	DELEGATED AUTHORITY None - recommends only. All inventory, cylinder and van write-offs are approved by the Finance Manager or above (R-00.5)

4.1 DUTIES & RESPONSIBILITIES

- **The reconciliation identity.** Owns and proves, every month: cylinders issued to date = on hand (warehouse + van + branch) + with customers (deposit register) + condemned/scrapped + unexplained variance. Reports the unexplained line as a trend, because a growing trend is the signal, not the absolute number.
- **Count programme.** Plans and supervises monthly warehouse counts (blind sheets), weekly branch cycle counts, daily van scan reconciliation and the annual full network count; ensures counts are performed by people who do not hold custody.
- **Cylinder register.** Maintains the serialised register - size, gas type, manufacture date, inspection due date, current location state; ensures every new cylinder is QR-tagged and registered before it enters circulation.
- **Deposit register.** Reconciles cylinders-with-customers to the deposit liability with the Chief Accountant; investigates drift between unit count and value.
- **Condemnation and scrap.** Controls the condemned holding cage; ensures no scrap journal posts without a signed destruction certificate and photo evidence; confirms scrapped units cannot re-enter circulation.
- **Inspection compliance.** Tracks periodic inspection and re-test due dates against ISO 4706 / ISO 10464 as adopted locally; pulls overdue cylinders from circulation - a

safety control as much as a financial one.

- **Variance investigation.** Investigates every count difference to root cause before any write-off; distinguishes a counting error, a system error, a process gap and a loss, because each has a different fix.
- **Idle and slow-moving.** Produces cylinder velocity and ageing analysis; flags units idle over 12 months for inspection, provision or scrap, and supplies the input to the obsolescence provision.
- **Filling loss.** Calculates loss per shift and per plant against the 0.8% target; investigates any shift above 1.5%; distinguishes normal shrinkage (absorbed in cost) from abnormal loss (expensed immediately under POL-15.1).
- **Daily van and route settlement.** Performs the three-way match per route - the Souq Gas app delivery log, the warehouse gate scan and the GL posting batch. Shift close-out is blocked until all three agree. Verifies that loaded minus delivered equals expected remaining against actual scanned remaining, applying **zero tolerance** to full-cylinder shortages.
- **Settlement investigation.** Takes driver statements on shortages; distinguishes scanning error, process gap and loss; documents root cause before recommending any write-off. Monitors empty-return shortfall by route and investigates rates above 2% of exchanges.
- **Incentive interface.** Supplies the delivery and variance data that determines driver incentive eligibility, so that an incentive is held where an unresolved variance stands against an individual (POL-20).

4.2 AUTHORITY & SEGREGATION

✗ THE INVENTORY CONTROLLER MUST NEVER

Hold physical custody of cylinders, gas or van cash; be the sole signatory on a count they supervised; load or receive stock at the gate; **approve any write-off at all** - the role investigates and recommends, and the Finance Manager approves (R-00.5); or adjust the system quantity to agree to a count without a documented root cause. Adjusting the book to match the floor without explanation destroys the only signal the company has.

4.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Accounting, Supply Chain or Logistics	-

DIMENSION	ESSENTIAL	PREFERRED
Certification	Part-qualified accountant, CPIM or equivalent inventory certification	CMA or CPIM fully certified
Experience	5-8 years in inventory control across multiple physical locations	Returnable assets -cylinders, kegs, pallets, crates
Technical	Perpetual inventory; cycle and blind counting; serialised asset tracking; variance root-cause analysis; route settlement reconciliation across independent systems	Barcode/QR and handheld scanning deployments
Systems	ERP inventory module; WMS; scanner data extraction; strong Excel	Souq Gas driver app data
Language	Arabic essential (works directly with plant, warehouse and driver teams); English	-
Behavioural	Willing to be physically present at counts; not deterred by inconvenient findings	-

4.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Unexplained cylinder variance as % of population	< 0.5% and not increasing	Monthly	Reconciliation identity
Count programme completed to plan	100% of scheduled counts	Monthly	Count calendar
Deposit register vs. liability reconciled	Zero unexplained	Monthly	Deposit reconciliation
Variances root-caused before write-off	100%	Monthly	Variance investigation log
Empty-to-full ratio	Within Board-approved band	Monthly	Stock report
Cylinders overdue for periodic inspection in circulation	Zero	Monthly	Cylinder register
Scrap posted without destruction certificate	Zero	Monthly	Scrap batch file
Van shifts settled same day	100%	Monthly	Settlement log
Shifts with any cash or stock variance	< 2% of shifts	Monthly	Variance register
Full-cylinder shortages unresolved after 24 hours	Zero	Monthly	Investigation log
Empty return shortfall	< 2% of exchanges	Monthly	Route return analysis
Filling loss as % of gas throughput	<= 0.8%	Monthly	Plant batch records vs. bulk issues

KPI	TARGET	FREQUENCY	SOURCE
Annual full network count completed	Within 5 working days of year end	Annual	Count sign-off
Cylinder velocity (exchanges per serial per year)	Above target; long tail reducing	Annual	Register analysis
Audit adjustments to inventory quantity	Zero material	Annual	Audit schedule

4.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Daily	Three-way match per route; full-cylinder shortages (zero tolerance); COD cash tie with Treasury	Finance Manager on exception
Weekly	Branch cycle counts; empty return shortfall by route; condemned cage contents	Finance Manager
Monthly	Warehouse blind count; reconciliation identity; deposit register; inspection due list	Finance Manager sign-off; Chief Accountant for the deposit tie-out
Annually	Full network count; provision recommendation; register integrity review	CFO; external auditor attends the count

R-05 ACCOUNTING FIXED ASSETS ACCOUNTANT

Owns everything Best Gas owns that is *not* a cylinder -filling plant, bulk tanks, fleet, buildings, IT and the capitalised Souq Gas platform -from capitalisation through depreciation to disposal.

REPORTS TO Chief Accountant	DIRECT REPORTS None
CONTROL LINE Second line	DELEGATED AUTHORITY None; prepares for Finance Manager and CFO approval

5.1 DUTIES & RESPONSIBILITIES

- **Capitalisation.** Applies the SAR 5,000 threshold and the directly-attributable-cost rule; challenges attempts to capitalise training, relocation or routine maintenance;

prevents aggregation of low-value items to cross the threshold.

- **Cylinder boundary.** Enforces the hard line that **cylinders are inventory, never fixed assets** (POL-15), regardless of order value - the single most common miscoding risk in this business.
- **Assets under construction.** Maintains the AUC register; ensures no depreciation runs on AUC; transfers into service on the date the asset becomes *available for use*, not the date of final invoice.
- **Souq Gas development costs.** Applies the IAS 38 stage split with the engineering lead each sprint; capitalises only application-development-stage cost; expenses research, planning and post-launch maintenance; prevents retrospective reclassification of expensed cost into an asset.
- **Depreciation.** Runs the monthly charge; reviews useful lives, residual values and methods at each reporting date; applies revisions prospectively as changes in estimate.
- **Verification.** Performs annual physical verification of plant, vehicles and major IT against the register; investigates assets on the register that cannot be found, and assets on site that are not on the register.
- **Disposals.** Ensures approval per the DoA before disposal; records proceeds and gain or loss in the same period as physical disposal; confirms the asset is removed from insurance schedules.
- **Impairment.** Monitors the indicators in POL-22 and escalates where a plant, branch or route network shows the triggers; assembles the CGU data for the recoverable amount test.

5.2 AUTHORITY & SEGREGATION

✗ THE FIXED ASSETS ACCOUNTANT MUST NEVER

Approve a capex request; authorise a disposal; hold custody of the assets they verify; or capitalise expenditure without an approved capex authority reference. A capitalisation without an approval reference is an unauthorised commitment already spent.

5.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Accounting	-
Certification	Accounting studies in progress	Part-qualified SOCPA, ACCA or CMA

DIMENSION	ESSENTIAL	PREFERRED
Experience	2-5 years including fixed asset register maintenance	Asset-heavy industry; capitalisation of internally developed software
Technical	IAS 16 and IAS 38; depreciation methods; AUC control; impairment indicators	IFRS 16 interaction with owned assets
Systems	ERP fixed asset module; Excel	Asset tagging and verification tools
Language	Arabic and English	-
Behavioural	Precise; comfortable challenging a manager over a capitalisation request	-

5.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Depreciation run completed and posted	By working day 3	Monthly	ERP depreciation log
Register reconciled to GL control account	Zero difference	Monthly	Reconciliation register
Additions with a valid capex approval reference	100%	Monthly	Addition listing
Cylinders miscoded to fixed assets	Zero	Monthly	Addition listing review
AUC items older than 12 months without transfer	Zero unexplained	Monthly	AUC ageing
App development stage split certified with engineering	100% of sprints	Monthly	Sprint capitalisation sheet
Physical verification coverage	100% of plant, fleet and major IT	Annual	Verification report
Assets on register not located	Zero after investigation	Annual	Verification exception log
Useful life review completed	All classes	Annual	Review memo

5.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Monthly	Additions vs. capex approvals; AUC ageing; depreciation reasonableness; register-to-GL tie	Chief Accountant
Quarterly	Impairment indicator scan; disposal completeness; insurance schedule alignment	Finance Manager
Annually	Physical verification; useful life and residual review; capitalisation policy compliance	Finance Manager and CFO; external audit sample testing

IV

PROCURE-TO-PAY

The roles that commit the company's money and the roles that release it - deliberately kept apart.

R-06

PROCURE-TO-PAY

ACCOUNTS PAYABLE ACCOUNTANT

Ensures Best Gas pays what it genuinely owes, once, on time, to the right party. The last checkpoint before company cash leaves for a supplier.

REPORTS TO Chief Accountant	DIRECT REPORTS None
CONTROL LINE Second line	DELEGATED AUTHORITY None - prepares the payment proposal; never releases it

6.1 DUTIES & RESPONSIBILITIES

- **Three-way match.** Matches every invoice to purchase order and goods received note; blocks anything outside tolerance for investigation rather than releasing it on judgement. For bulk LPG, matches to the *independently metered* receipt, never the supplier's delivery note quantity.
- **Invoice validity.** Accepts only valid tax invoices; rejects statements, pro-formas and quotations; verifies VAT number and that the invoice is addressed to the correct Best Gas entity so input VAT is recoverable.
- **Duplicate prevention.** Checks vendor, invoice number, amount and date before booking; investigates near-duplicates rather than assuming.
- **Payment proposal.** Builds the weekly run from invoices due within terms; prepares supporting documentation for the Finance Manager's approval; never releases the batch (POL-24).
- **GRN clearing.** Reconciles the GRN clearing account monthly; chases received-not-invoiced items so accruals are accurate at cut-off.
- **Vendor statements.** Reconciles major supplier statements - especially the bulk gas supplier - to the ledger monthly, and resolves differences before they age.

- **Ageing and terms.** Maintains AP ageing; flags early-payment discount opportunities and overdue exposure; ensures no supplier is paid materially early to disguise a liquidity position.
- **WHT flagging.** Identifies payments to non-resident vendors and refers to Tax before payment so withholding is applied at source (POL-33).

6.2 AUTHORITY & SEGREGATION

✗ ACCOUNTS PAYABLE MUST NEVER

Create or amend a vendor record; change vendor bank details; release a payment or hold bank signatory rights; or confirm goods receipt. This role prepares and evidences; a different role approves and a third releases.

6.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Diploma or Bachelor's in Accounting	Bachelor's
Certification	-	Accounting studies in progress
Experience	2-5 years in accounts payable with PO-based matching	High-volume, multi-site AP
Technical	Three-way match; VAT input recovery rules; accrual identification; vendor statement reconciliation	WHT awareness
Systems	ERP AP module; Excel	Invoice capture / OCR workflow
Language	Arabic and English	-
Behavioural	Says no to a pressured payment without a match; resistant to urgency as an argument	-

6.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Invoices processed within 3 working days of receipt	> 95%	Monthly	ERP invoice log
Invoices paid without a valid three-way match	Zero	Monthly	Exception report
Duplicate payments	Zero	Monthly	Duplicate detection report

KPI	TARGET	FREQUENCY	SOURCE
GRN clearing items older than 60 days	Zero unexplained	Monthly	GRN reconciliation
Major vendor statements reconciled	100%	Monthly	Statement reconciliation file
Invoices paid within agreed terms	> 95%	Monthly	AP ageing
Late-payment penalties or supply interruptions	Zero	Annual	Vendor correspondence log
Input VAT disallowed on audit for invalid invoices	Zero	Annual	ZATCA / audit findings

6.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Daily	Match exceptions; invoice validity; duplicate flags	-
Weekly	Payment proposal preparation and support pack	Finance Manager approves; Treasury releases
Monthly	GRN clearing; vendor statements; ageing; accrual list for close	Chief Accountant
Annually	Supplier balance confirmations for audit	External auditor circularisation

R-07 PROCURE-TO-PAY PROCUREMENT OFFICER

Secures what the business needs at a defensible price, on approved terms, from vetted suppliers -and creates the commitment record that everything downstream depends on. Buys cylinders as trading stock; Best Gas does not manufacture them.

REPORTS TO Finance Manager	DIRECT REPORTS None
CONTROL LINE First line - owns the commitment risk	DELEGATED AUTHORITY Raises POs within the requester's approved limit; no approval authority of its own

7.1 DUTIES & RESPONSIBILITIES

- **Competition.** Obtains the number of quotes required by value (POL-23.1); documents the evaluation; manages sealed tenders above SAR 250,000.
- **Purchase orders.** Raises the PO **before** the commitment is made; refuses retrospective POs and reports attempts as a policy breach rather than processing them.
- **Cylinder procurement.** Sources finished, certified cylinders (ISO 4706 as adopted locally) from qualified manufacturers; verifies certification before acceptance; books them to inventory, never capex.
- **Bulk LPG contracting.** Administers the standing supply agreement; updates the monthly contract price in the system on its effective date so downstream costing is right first time.
- **Vendor vetting.** Collects CR, VAT certificate and bank confirmation; submits for screening under POL-09; arranges annual re-vetting of critical suppliers.
- **Single sourcing.** Documents and justifies each waiver of competition; obtains approval one level above the normal threshold; never uses urgency as a standing justification.
- **Contract administration.** Ensures written contracts with anti-bribery undertakings and audit rights for agents and intermediaries; tracks expiry and renewal.
- **Supplier performance.** Tracks on-time delivery, quality rejections and price variance; feeds gas quality failures back into the receiving control.

7.2 AUTHORITY & SEGREGATION

✗ PROCUREMENT MUST NEVER

Confirm goods receipt for its own PO; create or amend the vendor master or vendor bank details; approve an invoice for payment; or accept any gift or hospitality from a bidder during a live tender (POL-07.1). The buyer and the receiver must be different people.

7.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Supply Chain, Business or Engineering	-
Certification	-	CIPS or equivalent procurement qualification

DIMENSION	ESSENTIAL	PREFERRED
Experience	4 - 7 years in procurement including tendering and contract administration	Industrial gas, energy or heavy equipment; import and customs exposure
Technical	Tender evaluation; total cost of ownership; contract terms; Incoterms	Cylinder and pressure-equipment standards
Systems	ERP purchasing module	e-Sourcing platform
Language	Arabic and English	-
Behavioural	Demonstrably incorruptible; documents decisions as a habit	-

7.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Purchases with a PO raised before commitment	100%	Monthly	PO vs. GRN date analysis
Retrospective PO requests	Zero (all reported, none processed)	Monthly	Exception log
Competition requirements met by value band	100%	Monthly	PO file documentation
Single-source waivers approved and logged	100% of instances	Monthly	Waiver register
Supplier on-time delivery	> 95%	Monthly	GRN vs. PO date
Bulk price change loaded on effective date	100%	Monthly	Contract price log
Cylinder certification verified before acceptance	100% of consignments	Monthly	Receiving file
Cost savings vs. prior price or budget	Board-approved target	Annual	Savings register, validated by Finance
Critical suppliers re-vetted	100%	Annual	Vendor due diligence file

7.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Daily	PO release against approved requisitions; delivery scheduling	-
Monthly	Supplier performance; price variance; open PO ageing	Finance Manager
Quarterly	Waiver register; contract expiry pipeline	Finance Manager; Audit Committee sees the waiver summary
Annually	Supplier re-vetting; savings validation; conflict of interest declaration	CFO; Internal Audit tests tender files

V ORDER-TO-CASH

The roles that turn gas into invoiced revenue and invoiced revenue into banked cash - across counters, contracts, vans and the app.

R-08

ORDER-TO-CASH

RECEIVABLES & CREDIT ACCOUNTANT

Owns the receivables cycle end to end - assessing credit, raising B2B invoices, applying receipts, chasing what is owed and provisioning for what will not arrive. Assessment and collection sit here; **approval of limits, suspensions and write-offs sits with the Finance Manager (R-00.5)**, so the person who prepares a credit decision never also grants it.

REPORTS TO Finance Manager	DIRECT REPORTS None
CONTROL LINE Second line	DELEGATED AUTHORITY None - assesses and recommends; limits, suspensions and write-offs are approved by the Finance Manager or above

8.1 DUTIES & RESPONSIBILITIES

- Applies customer receipts accurately and promptly against specific invoices; investigates unapplied cash rather than leaving it on account, because unapplied cash hides both overpayments and misappropriation.
- Issues monthly consolidated statements to B2B accounts and reconciles customer-confirmed balances to the ledger.
- Raises credit notes only on approved authority and with documented reason; never issues a credit note to clear an aged balance without approval.
- Reconciles the AR sub-ledger to the GL control account monthly to the cent.
- Maintains the receivables ageing and supplies it for the ECL calculation.
- Reconciles PSP and card settlements received into the collections account against the amounts recorded at branch and app level, working with Treasury (SOP-16.3).
- **Credit assessment.** Evaluates every application on Commercial Registration, VAT registration, trade and bank references, and financial statements above the material

threshold; confirms POL-09 screening is complete; *recommends* a limit to the Finance Manager and never sets one directly. Sales may not set or vary a limit at all.

- **Limit administration.** Applies approved limits as a system block rather than a report; prepares the annual review, and an immediate re-review on default or adverse news.
- **Suspension discipline.** Ensures supply is automatically suspended at 60 days overdue and escalates release requests to the Finance Manager, who may release only against a documented payment plan - not a promise.
- **Collections.** Runs the dunning cycle through reminder, account manager contact, suspension and legal referral, keeping a contemporaneous contact record that will stand up in a dispute.
- **ECL provisioning.** Maintains the IFRS 9 provision matrix, adjusts baseline rates for forward-looking information, and recalibrates annually against actual loss history (POL-18).
- **Security.** Obtains and monitors guarantees, post-dated instruments and deposits for material or newly established accounts, tracking expiry so security never lapses unnoticed.
- **B2B invoicing.** Raises the monthly consolidated invoices against delivery records and contract price terms, and maintains customer billing master data - legal name, VAT number, address - so invoices are valid and customers can recover input VAT.
- **Retail boundary.** Enforces that retail refill and exchange is cash, card or wallet only; credit is never extended at a counter or on a van.
- Supports the annual audit circularisation of customer balances.

8.2 AUTHORITY & SEGREGATION

✗ ACCOUNTS RECEIVABLE MUST NEVER

Collect or bank customer cash; approve a credit note; **set, vary or release a credit limit or suspension**; approve a bad-debt write-off; or assess an account in which they have any declared interest. Applying receipts and collecting receipts must be different people - this is the control that prevents lapping - and preparing a credit decision must be separate from granting it.

8.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Diploma or Bachelor's in Accounting	Bachelor's
Experience	4 - 7 years across receivables and credit control with B2B portfolios	High-volume, multi-channel receipts including card and wallet
Technical	Cash application; sub-ledger to GL reconciliation; ageing analysis; credit assessment; IFRS 9 ECL provision matrices; collections escalation	PSP settlement reconciliation
Systems	ERP AR module; Excel	Payment gateway reporting portals
Language	Arabic and English	-
Behavioural	Accurate and persistent; will not park a difference; firm with customers without damaging the relationship, and immune to sales pressure	-

8.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Receipts applied within 1 working day	> 98%	Monthly	ERP application log
Unapplied cash at month end	< 1% of receipts	Monthly	AR sub-ledger
AR sub-ledger to GL difference	Zero	Monthly	Reconciliation register
Statements issued to all B2B accounts	100% by working day 3	Monthly	Statement run log
PSP settlement differences cleared	Zero over 5 days old	Monthly	Settlement-in-transit account
Credit notes issued without approval	Zero	Monthly	Credit note log
B2B invoices issued by working day 3	100%	Monthly	Billing run log
Days sales outstanding (B2B)	Within Board target	Monthly	AR ageing
Receivables over 90 days as % of B2B balance	< 5%	Monthly	AR ageing
Accounts trading beyond approved limit	Zero	Monthly	Credit block exception report
Suspensions applied at 60 days	100% of qualifying accounts	Monthly	Suspension log

KPI	TARGET	FREQUENCY	SOURCE
New accounts screened before first credit supply	100%	Monthly	Onboarding file
Bad debt written off as % of B2B revenue	< 0.5%	Annual	GL write-off account
ECL matrix recalibrated against actual losses	Completed	Annual	Provision working paper
Customer confirmations agreed at audit	> 95% without exception	Annual	Audit circularisation

8.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Daily	Bank receipts vs. remittances; unapplied cash queue	-
Monthly	Sub-ledger to GL; statements; PSP settlement clearing; ECL provision; DSO and concentration	Finance Manager, then Chief Accountant
Annually	Balance confirmations; ageing integrity for provisioning	External auditor

R-09

ORDER-TO-CASH

BRANCH ACCOUNTANT / CASHIER

The company's cash and stock at the point of sale. A first-line role, close to the customer, holding the exposure that this business loses most money to when it is uncontrolled.

REPORTS TO Branch Manager (line); Finance Manager (functional)	DIRECT REPORTS None
CONTROL LINE First line - owns the risk at source	DELEGATED AUTHORITY None; may not approve refunds or discounts

9.1 DUTIES & RESPONSIBILITIES

- Processes refill and exchange sales at the counter, scanning the cylinder QR and refusing any serial not in the Best Gas register.
- Ensures the pre-and post-fill weigh-in is captured and **printed on the customer receipt** - the single control against short-filling.

- Offers card and Souq Gas wallet payment first; accepts cash as the exception; never extends credit at the counter.
- Collects and records cylinder deposits correctly against the customer record and the specific serial issued.
- Counts cash under dual control at every handover; banks takings intact the same business day; never uses cash for payments, change against other days' takings, or deposit refunds.
- Reconciles the shift: system-recorded takings vs. physical cash vs. bank deposit slip; reports variances immediately rather than carrying them.
- Participates in branch cycle counts of full and empty cylinders, and flags damaged returns to the condemned process.
- Escalates suspected short-filling, unregistered cylinders or customer pressure to bypass a control.

9.2 AUTHORITY & SEGREGATION

✗ THE BRANCH CASHIER MUST NEVER

Post cash receipts to the general ledger; approve a deposit refund or a credit note; perform the branch stock count alone as the sole signatory; or hold both the cash and the reconciliation of that cash. Where a small branch cannot separate these, POL-11.2 compensating controls apply and must be documented.

9.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Secondary certificate; diploma in accounting or commerce	Diploma or Bachelor's
Experience	0-3 years in cash handling or retail point of sale	LPG, fuel retail or high-volume cash environment
Technical	POS operation; cash counting and banking discipline; deposit rules; QR scanning	Basic bookkeeping
Systems	POS terminal; card reader; Souq Gas wallet acceptance	ERP enquiry access
Language	Fluent Arabic essential (customer-facing)	English
Behavioural	Scrupulous honesty; follows the weigh-in rule under queue pressure	-

DIMENSION	ESSENTIAL	PREFERRED
Pre-employment	Background and reference check mandatory for all cash-handling roles	-

9.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Shift cash variance	Within SAR 25 or 1% of shift cash	Monthly	Shift reconciliation
Takings banked same business day	100%	Monthly	Bank deposit slips vs. POS
Average fill weight vs. rated capacity	>= 97%	Monthly	Weigh-in data by attendant
Sales without a printed weigh-in	Zero	Monthly	POS receipt audit
Electronic payment share of branch takings	Increasing vs. prior period	Monthly	POS tender mix
Cylinder count variance at the branch	Zero unexplained	Monthly	Cycle count
Repeat variances attributable to the individual	Zero	Annual	Variance log by cashier
Surprise count exceptions	Zero	Annual	Internal Audit report

9.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Every shift	Opening float; takings vs. system; cash count under dual control; banking	Branch Manager countersigns
Weekly	Cylinder cycle count participation; deposit records	Inventory & Settlement Controller
Monthly	Variance summary; tender mix; weigh-in compliance	Finance Manager (functional review)
Unannounced	Surprise cash and stock counts	Internal Audit

VI

TREASURY, TAX & PAYROLL

The roles that guard the bank accounts, the statutory obligations and the largest recurring payroll outflow.

R-10

TREASURY

TREASURY OFFICER

Protects the company's liquidity and controls the movement of its cash. In a business that buys steel, holds deposits and finances gas before it collects, liquidity - not profit - is the binding constraint.

REPORTS TO Finance Manager	DIRECT REPORTS None
CONTROL LINE Second line	DELEGATED AUTHORITY Releases approved payments as second signatory below SAR 50,000; no approval authority

10.1 DUTIES & RESPONSIBILITIES

- **Cash forecasting.** Maintains the 13-week rolling forecast, updated weekly and reconciled back to actuals so forecast accuracy is itself measured and improved.
- **Daily position.** Publishes the daily cash position - bank balances, expected PSP settlements, upcoming payment runs - to the CFO each morning.
- **Liquidity floor.** Monitors available liquidity against the three-month floor in POL-30 and escalates a projected breach immediately, not at the next meeting.
- **Payment release.** Releases approved batches under maker-checker, including the **payroll file** once the Finance Manager has approved the run; verifies the beneficiary account is in the counterparty's own name; refuses any payment to a third-party or personal account without CFO approval.
- **Bank reconciliation.** Ensures all accounts are reconciled monthly and high-volume collection accounts daily, by someone who neither raises nor releases payments; escalates reconciling items over 30 days.
- **COD and PSP settlement.** Verifies that COD cash recorded on each route matches the same-day bank deposit slip, and reconciles POS/app batch totals, PSP

settlement reports and bank credits daily; maintains the settlement-in-transit account and clears it as credits land rather than assuming timing.

- **Sweeping and placement.** Sweeps collection accounts to the operating account daily; places surplus only in capital-preserving instruments with approved counterparties; never engages in speculative or leveraged positions.
- **Facilities and covenants.** Maintains the register of facilities, guarantees and covenants; tests covenants quarterly and forecasts them forward so a breach is predicted, not discovered.
- **Deposit awareness.** Treats customer cylinder deposits as repayable liabilities in liquidity planning, never as permanent funding.

10.2 AUTHORITY & SEGREGATION

✗ TREASURY MUST NEVER

Prepare the payment batch it releases; create or amend vendor bank details; perform the bank reconciliation for an account it releases payments from; open or close a bank account or change a mandate (Board reserved); or place funds in an instrument outside the approved list.

10.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Finance, Accounting or Economics	-
Certification	-	CTP, ACT or part-qualified accountant
Experience	4 - 7 years in treasury or cash management	Multi-account, multi-channel collections including card and wallet
Technical	Cash forecasting; bank reconciliation; covenant testing; PSP settlement mechanics	Facility documentation; FX basics
Systems	Online banking platforms; ERP cash module; advanced Excel	Treasury management system
Language	Arabic and English	-
Behavioural	Absolutely rule-bound on payment release; unmoved by urgency claims	-

10.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Daily cash position published by 10:00	100% of business days	Monthly	Distribution log
13-week forecast accuracy at week 4	Within 10%	Monthly	Forecast vs. actual
Liquidity headroom vs. 3-month floor	Never breached	Monthly	Forecast and bank balances
Bank accounts reconciled	100% by working day 2	Monthly	Reconciliation register
Reconciling items over 30 days	Zero	Monthly	Reconciliation register
Route COD cash matching bank deposit	100% of routes	Monthly	App COD total vs. deposit slips
PSP settlement-in-transit cleared	Zero over 5 days	Monthly	Settlement account
Payments released outside maker-checker	Zero	Monthly	Bank platform audit trail
Covenant breaches unforecast	Zero	Annual	Covenant register
Idle cash held above operating need	Minimised vs. target	Annual	Average balance analysis

10.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Daily	Bank balances; PSP settlements; beneficiary verification before release; sweeps	Finance Manager on exception
Weekly	13-week forecast update; payment run release	Finance Manager; CFO sees the forecast
Monthly	Bank reconciliations; settlement clearing; liquidity headroom	Chief Accountant reviews reconciliations independently
Quarterly	Covenant testing and forward projection; facility register	CFO; Board where a breach is projected

Keeps Best Gas compliant with ZATCA across VAT, e-invoicing, Zakat and withholding tax - at the scale of a distributor issuing thousands of invoices a month across four channels.

REPORTS TO Finance Manager	DIRECT REPORTS None
CONTROL LINE Second line	DELEGATED AUTHORITY None; prepares all returns for CFO approval before submission

11.1 DUTIES & RESPONSIBILITIES

- **VAT returns.** Prepares the monthly return; reconciles output VAT per the sales ledger, input VAT per the purchase ledger, and the ZATCA acknowledgement log before filing.
- **Deposit treatment.** Verifies that refundable cylinder deposits are excluded from the taxable base and that the system enforces the split at the point of sale - the highest-value VAT judgement in this business.
- **E-invoice clearance.** Monitors real-time clearance through the ZATCA integration and resolves every rejection the same business day, escalating technical failures to IT - an uncleared invoice is an unrecorded sale and a compliance breach at once.
- **E-invoicing completeness.** Owns the compliance position on Phase 2 integration and *independently* reconciles invoice counts and values across POS, the Souq Gas app and B2B billing against the ZATCA acknowledgement log - proving completeness rather than assuming it. Any channel found issuing a sale outside clearance is raised as a control incident under POL-10.2.
- **Deposit split assurance.** Verifies that the refundable deposit is excluded from the taxable base at the point of sale in every channel - the highest-value VAT judgement in this business.
- **Zakat.** Builds the annual Zakat base from the approved financial statements; prepares provisional and final returns; obtains the Zakat certificate needed for government tenders; flags any shareholding change that would split the base between Zakat and income tax.

- **Withholding tax.** Determines treatment for non-resident vendors before the first payment; deducts at source and files the monthly return.
- **Compliance calendar.** Maintains deadlines with owners and escalation dates; treats a missed deadline as a reportable control failure whether or not a penalty results.
- **Authority correspondence.** Routes all ZATCA assessments, queries and audits to the CFO on receipt; never negotiates or concedes a position without CFO authority.
- **Advisory.** Monitors changes in law, rates and wave thresholds; advises Finance and the business before a change takes effect rather than after.

11.2 AUTHORITY & SEGREGATION

✗ THE TAX ACCOUNTANT MUST NEVER

File a return without independent review and CFO approval; adopt an uncertain position without written advice and documented reasoning; settle or concede to ZATCA on their own authority; or post the tax journals they also prepare and review without a second pair of eyes.

11.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Accounting or Law with tax specialisation	Master's in Taxation
Certification	SOCPA, CPA or ACCA - part-qualified minimum	Fully qualified with a Saudi tax specialisation
Experience	4 - 7 years in Saudi VAT and Zakat, including live Phase 2 e-invoicing	Big-four tax practice; ZATCA audit defence experience
Technical	VAT Implementing Regulations; Zakat base computation; WHT categories; e-invoicing resolution	Customs and excise
Systems	ERP tax configuration; ZATCA Fatoora portal	Tax engine or determination software
Language	Fluent Arabic essential - filings and correspondence are in Arabic; English	-
Behavioural	Conservative by instinct; documents the reasoning, not just the answer	-

11.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
VAT return filed and paid on time	100%	Monthly	Compliance calendar; ZATCA portal
Output VAT reconciled to sales ledger	Zero unexplained difference	Monthly	VAT reconciliation
E-invoices cleared successfully first time	> 99%	Monthly	ZATCA acknowledgement log
Clearance rejections resolved same business day	100%	Monthly	Rejection queue
Channel completeness: sales vs. invoices vs. ZATCA acknowledgements	Zero unexplained gap	Monthly	Three-way completeness reconciliation
Deposits excluded from the taxable base	100% correct	Monthly	VAT reconciliation
Input VAT recovered on valid invoices only	100%	Monthly	Purchase ledger review
WHT deducted before payment to non-residents	100%	Monthly	WHT return vs. AP listing
Penalties or interest for late or incorrect filing	Zero	Annual	ZATCA assessments
Zakat return filed within statutory deadline	100%	Annual	ZATCA acknowledgement
Zakat certificate obtained	Before tender season	Annual	Certificate on file
Material assessments raised on audit	Zero	Annual	ZATCA correspondence

11.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Daily	Clearance rejection queue; new non-resident vendor flags	-
Monthly	VAT reconciliation; WHT listing; completeness reconciliation; compliance calendar status	Chief Accountant reviews completeness independently; Finance Manager reviews; CFO approves the return
Quarterly	Legislative change scan; uncertain position register	CFO; external adviser where needed
Annually	Zakat computation and base build; certificate; audit support	CFO and external tax adviser; Internal Audit tests compliance

VII

PLANNING & SYSTEMS

The roles that turn the ledger into foresight, and that keep the systems producing numbers Finance can trust.

R-12

PLANNING

FP&A ANALYST

Turns what happened into what is likely to happen, and gives the Board a number it can act on. The only finance role whose primary output is a decision rather than a record.

REPORTS TO Chief Financial Officer	DIRECT REPORTS None
CONTROL LINE Second line	DELEGATED AUTHORITY None; no transactional access to post entries

12.1 DUTIES & RESPONSIBILITIES

- **Budget.** Builds the annual budget bottom-up per plant, branch and van route - gas volumes, cylinder purchases, headcount, incentive cost - and consolidates it for Board approval.
- **Reforecast.** Produces the quarterly rolling reforecast without discarding the original budget baseline, so variance commentary stays honest across the year.
- **Management pack.** Produces the monthly pack by working day 5: P&L by channel, balance sheet, cash flow, KPI scorecard and variance commentary on any line moving more than 5% or SAR 100,000.
- **Commentary quality.** Explains causes in operational terms - a route lost, a plant down, a price change - never by restating the number in words.
- **Margin analysis.** Produces gross margin by channel - refill, exchange, B2B and Souq Gas app - and by plant and route, explaining movement in operational terms.
- **KPI scorecard.** Owns the definitions and the data sources so a metric means the same thing every month; challenges any metric produced from a spreadsheet only one person holds.
- **Reporting build.** Builds and validates the finance reports drawn from the ERP with IT, so Finance is not dependent on manual spreadsheet extraction for anything it reports.

- **Capital appraisal.** Builds discounted cash flow models for capex above SAR 100,000; applies the approved hurdle rate; runs sensitivity analysis; excludes sunk cost and includes opportunity cost.
- **Post-implementation review.** Conducts the mandatory review within 12 months for projects above SAR 1,000,000 and reports honestly where a business case did not deliver - this is how optimistic forecasting gets corrected.
- **Scenario work.** Models feedstock price movements against regulated selling prices to show the Board where margin breaks.

12.2 AUTHORITY & SEGREGATION

✗ FP&A MUST NEVER

Post journals or hold transactional posting access; adjust reported actuals to improve a variance; build the business case for a project and then also perform its independent post-implementation review as the sole reviewer; or publish a KPI whose source cannot be traced to a system.

12.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Finance, Accounting, Economics or Engineering	Master's or MBA
Certification	-	CMA, CFA level 1+, or part-qualified accountant
Experience	4 - 7 years in FP&A, business partnering or corporate finance	Distribution or asset-heavy operations; route-level profitability
Technical	DCF and investment appraisal; driver-based forecasting; variance analysis; sensitivity modelling	Working capital modelling for deposit-based businesses
Systems	Advanced Excel and financial modelling; ERP reporting	Power BI, Tableau or planning software
Language	English essential for Board reporting; Arabic	-
Behavioural	Tells the Board what it needs to hear; separates analysis from advocacy	-

12.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Gross margin by channel published	By working day 4	Monthly	Management pack

KPI	TARGET	FREQUENCY	SOURCE
Management pack issued by working day 5	100%	Monthly	Distribution log
Variance commentary on all qualifying lines	100%	Monthly	Management pack review
KPI definitions traceable to a source system	100%	Monthly	KPI definition register
Restatements of previously reported management figures	Zero	Monthly	Pack version history
Forecast accuracy: revenue and EBITDA one quarter out	Within 5%	Annual	Reforecast vs. actual
Budget delivered for Board approval before year start	On schedule	Annual	Board calendar
Post-implementation reviews completed for qualifying projects	100%	Annual	PIR register
Capex appraisals using the approved hurdle rate	100%	Annual	Business case files

12.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Monthly	Pack ties to the locked trial balance; KPI source validation; commentary quality	CFO before circulation; Finance Manager confirms the tie-out
Quarterly	Reforecast build; margin scenario refresh	CFO; Board receives the output
Annually	Budget consolidation; hurdle rate review; PIR findings	Board approves budget; CFO appraisal

VIII

PART VIII

INDEPENDENT ASSURANCE

The third line - the only roles in this manual that do not report to the CFO.

R-13

ASSURANCE

HEAD OF INTERNAL AUDIT

Provides the Board with independent, objective assurance that the controls described in the Policy and SOP manuals are actually operating - including the controls the CFO designed and operates.

REPORTS TO Audit Committee functionally; CEO administratively	DIRECT REPORTS Internal Auditor(s)
CONTROL LINE Third line - independent of all finance operations	DELEGATED AUTHORITY Unrestricted access to records, systems, property and personnel. No operational authority

13.1 DUTIES & RESPONSIBILITIES

- **Risk-based plan.** Builds the annual audit plan from the risk register (POL-12) and the fraud-scheme register (POL-08), weighted to cash handling, van and branch settlement, cylinder inventory, procurement and payments; obtains Audit Committee approval.
- **Assurance execution.** Tests whether controls operate, not whether they exist on paper; re-performs rather than accepting assertion.
- **Unannounced work.** Performs surprise cash counts, surprise cylinder counts and direct observation of van load-out and settlement, exercising an explicit right to do so without notice.
- **Fraud investigation.** Directs investigations under the Audit Committee, not the department involved; ensures evidence is preserved before confrontation and that no settlement conceals a fraud from auditors or authorities.
- **Findings and grading.** Grades findings on the POL-10.2 severity scale with a named owner and remediation date; publishes management responses alongside findings, including disagreements.
- **Remediation verification.** Independently re-tests remediation; escalates overdue high-severity findings to every Audit Committee meeting until closed.

- **Whistleblowing.** Operates the channel that bypasses management; ensures reports reach the Audit Committee Chair intact and that no retaliation follows.
- **Coordination.** Liaises with the external auditor to avoid duplication without ceding independence.

13.2 AUTHORITY & SEGREGATION

✗ INTERNAL AUDIT MUST NEVER

Report to the CFO; perform any operational finance duty; design or operate a control it will audit; audit an activity it held responsibility for within the previous 12 months; or allow management to limit its scope, direct its conclusions or edit its reports. If any of these occur, the third line has ceased to exist and the Audit Committee must be told.

13.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Accounting, Finance or Business	Master's
Certification	CIA , or SOCPA/CPA/ACCA with internal audit experience	CIA plus CFE (fraud) or CISA (systems)
Experience	7 - 12 years in internal or external audit, 3+ leading audits and reporting to a committee	Distribution, cash-intensive retail or LPG
Technical	IIA IPPF; COSO; risk-based planning; fraud investigation; data analytics on full populations	Forensic accounting
Systems	ERP audit trails; data extraction and analytics	Audit management software
Language	Fluent Arabic and English	-
Behavioural	Personal and professional independence; the resilience to deliver an unwelcome finding to the CFO or CEO	-

13.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Audit plan delivered to schedule	> 90% of planned engagements	Monthly	Plan tracker
Reports issued within 15 working days of fieldwork close	> 90%	Monthly	Report register

KPI	TARGET	FREQUENCY	SOURCE
Unannounced counts and observations performed	To plan	Monthly	Engagement log
High-severity findings overdue	Zero beyond agreed date	Monthly	Findings tracker
Remediation independently re-tested (not accepted on assertion)	100%	Monthly	Re-test working papers
Plan coverage of the highest-rated risks	100% over a rolling 3 years	Annual	Risk-to-plan mapping
Scope limitations imposed by management	Zero	Annual	Audit Committee report
External quality assessment of the function	Conforms with IIA standards	Annual	Quality assessment (external at least every 5 years)
Whistleblowing reports handled within policy timeframes	100%	Annual	Case log

13.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Continuous	Whistleblowing channel; analytics on full transaction populations	Audit Committee Chair
Monthly	Engagement progress; findings ageing	Audit Committee Chair
Quarterly	Plan status, findings summary, remediation status, any scope limitation	Audit Committee - formal report
Annually	Plan refresh; charter review; independence confirmation	Audit Committee approves plan, budget and appraisal

Performs the fieldwork that turns the audit plan into evidence -in the plant, at the branch counter, on the van, and in the data.

REPORTS TO Head of Internal Audit	DIRECT REPORTS None
CONTROL LINE Third line	DELEGATED AUTHORITY Access to records and systems within the engagement scope

14.1 DUTIES & RESPONSIBILITIES

- Executes engagements to the agreed programme: walkthroughs, control design assessment, sample and full-population testing, and clearly documented working papers that another auditor could re-perform.
- Attends unannounced cash and cylinder counts and observes van load-out and end-of-shift settlement in the field.
- Tests the highest-value controls directly: weigh-in printing on receipts, three-way van match, destruction certificates before scrap posting, vendor bank-change callbacks, payroll headcount reconciliation.
- Uses data analytics over complete populations rather than small samples where the data allows -duplicate payments, out-of-hours journals, round-sum entries, approvals just below a threshold.
- Drafts findings with condition, criteria, cause, effect and recommendation, and agrees factual accuracy with management before the report is issued.
- Re-tests remediation and reports honestly where a control has not in fact been fixed.
- Maintains strict confidentiality and reports any attempt to influence a finding to the Head of Internal Audit immediately.

14.2 AUTHORITY & SEGREGATION

✗ THE INTERNAL AUDITOR MUST NEVER

Perform an operational finance task; correct an error they find (they report it -correcting it makes them the control); audit an area they previously worked in within 12 months; or discuss findings outside the audit reporting line.

14.3 QUALIFICATIONS & COMPETENCIES

DIMENSION	ESSENTIAL	PREFERRED
Education	Bachelor's in Accounting, Finance or Business	-
Certification	Studying toward CIA or an accounting qualification	CIA part-qualified; CFE
Experience	2 -5 years in internal or external audit	Field/branch auditing in a cash-intensive business
Technical	Control testing; sampling; working paper documentation; interviewing	Data analytics (Excel, SQL or ACL/IDEA)
Systems	ERP read-only access; analytics tooling	Audit management software
Language	Fluent Arabic essential for field work; English for reporting	-
Behavioural	Objective; willing to travel to plants and depots unannounced	-

14.4 KEY PERFORMANCE INDICATORS

KPI	TARGET	FREQUENCY	SOURCE
Engagements completed within budgeted days	> 85%	Monthly	Time records
Working papers passing supervisory review first time	> 90%	Monthly	Review notes
Findings withdrawn after management challenge	Zero for factual error	Monthly	Report clearance log
Field visits and unannounced counts performed	To plan	Monthly	Engagement log
Population-level analytics used where data permits	> 70% of engagements	Annual	Engagement files
CPD hours completed	Per IIA requirement	Annual	Training record

14.5 CHECKS PERFORMED & REVIEW RECEIVED

FREQUENCY	CHECKS PERFORMED	REVIEWED BY
Per engagement	Control testing; evidence gathering; finding drafting	Head of Internal Audit - full working paper review
Monthly	Remediation re-testing	Head of Internal Audit
Annually	Independence declaration; CPD; competency assessment	Head of Internal Audit; Audit Committee for the function overall

PERFORMANCE GOVERNANCE

How every KPI in this manual is actually checked, reviewed and acted on through the year.

R-15

GOVERNANCE

KPI REVIEW & APPRAISAL CYCLE

A KPI that is never reviewed is decoration. This section fixes **who looks at what, when,** and what happens when a target is missed.

GOVERNING RULE

Every KPI in this manual is reviewed at least monthly by the holder's direct manager and at least annually in a formal appraisal. **Control KPIs - variances, reconciliations, segregation and compliance - are never traded off against efficiency KPIs.** A role that hits its speed target by skipping a control has failed, not succeeded.

15.1 THE REVIEW CALENDAR

WHEN	WHAT IS REVIEWED	BY WHOM	OUTPUT
Daily	Van and branch settlement exceptions; cash position; interface failures; e-invoice rejections; full-cylinder shortages	Role holder, escalating to Finance Manager	Same-day resolution or logged investigation
Weekly	AP and AR ageing; payment run; 13-week forecast; open variance log; cycle counts	Finance Manager	Exception actions with owners
Monthly (WD 1-5)	Close checklist; all reconciliations; inventory identity; VAT; payroll; management pack	Chief Accountant, then Finance Manager, then CFO	Locked trial balance and issued pack
Monthly (mid-month)	Each role's KPI scorecard vs. target	Direct manager, one-to-one with the holder	Documented actions on any missed target
Quarterly	DoA vs. system limits; user access vs. segregation; waivers; gifts register; covenants; risk register	Finance Manager, CFO, Audit Committee	Compliance monitoring report
Half-yearly	Progress against annual KPIs; development plan; competency gaps	Direct manager with HR	Mid-year review record
Annually	Full appraisal; policy attestation; conflict declarations; qualifications and CPD; succession	Direct manager, CFO, HR; Audit Committee for Internal Audit	Appraisal, rating, development and succession plan

15.2 APPRAISAL WEIGHTING

Every finance role is appraised on four weighted dimensions, so that control performance can never be outweighed by output volume.

DIMENSION	WEIGHT	MEASURED BY
Control & compliance - reconciliations, variances, segregation, policy adherence	40%	The KPIs marked in each charter; audit findings; attestation
Accuracy & timeliness - deadlines met without error	30%	Close, filing and reporting KPIs
Improvement & contribution - process improvement, cost or cycle-time reduction	20%	Documented initiatives with validated benefit
Behaviour & development - ethics, collaboration, CPD, developing others	10%	Manager assessment; CPD record

✗ AUTOMATIC DISQUALIFIERS

Regardless of every other score, an appraisal rating cannot be above "meets expectations" where the holder has, in the period: concealed a variance or a control failure; bypassed a segregation boundary; failed to declare a conflict of interest; retaliated against a whistleblower; or been the subject of a substantiated dishonesty finding.

15.3 WHEN A KPI IS MISSED

- 1. Diagnose before acting.** Establish whether the miss is a capability gap, a capacity gap, a process defect or a control being deliberately bypassed - the responses are entirely different and only the last is a conduct matter.
- 2. First miss** - documented in the monthly one-to-one with an agreed corrective action and a date.
- 3. Second consecutive miss** - a written improvement plan with support (training, tooling, cover) and a defined review point.
- 4. Persistent miss on a control KPI** - escalated to the CFO; delegated authority may be withdrawn under POL-03 while the plan runs.
- 5. Systemic miss across multiple holders** - treated as a process or resourcing defect, not individual failure; the Finance Manager owns redesign rather than repeated coaching.

15.4 KPI INTEGRITY

- Every KPI must name a **source system**. A metric that cannot be reproduced from a system by an independent person is withdrawn.
- Definitions are held in a central KPI register owned by FP&A; changes require Finance Manager approval and are dated, so trends stay comparable.
- Where a role reports its own KPI, an independent reviewer is named in that charter's checks table.
- Targets are reviewed annually with the budget. A target that has never been missed by anyone is not a control - it is set too low.

App.

REFERENCE APPENDIX

A.1 QUALIFICATION STANDARDS ACROSS THE ESTABLISHMENT

GRADE	MINIMUM EDUCATION	CERTIFICATION EXPECTATION	EXPERIENCE	ARABIC
EX	Bachelor's; Master's preferred	Fully qualified (SOCPA, CPA, ACCA, CA)	15+ yrs	Fluent
M3	Bachelor's in Accounting/Finance	Qualified or final stage	10 - 15 yrs	Fluent
M2	Bachelor's	Part-qualified minimum	7 - 12 yrs	Fluent
M1	Bachelor's	Part-qualified or specialist certification	5 - 8 yrs	Fluent
S3	Bachelor's	Studying toward qualification	4 - 7 yrs	Working
S2	Diploma or Bachelor's	Encouraged	2 - 5 yrs	Working
S1	Secondary or diploma	-	0 - 3 yrs	Fluent (customer-facing)

Arabic proficiency is not optional at any grade that touches statutory books, ZATCA filings or field/customer contact - the commercial books law requires records in Arabic.

A.2 MANDATORY PRE-EMPLOYMENT AND ONGOING REQUIREMENTS

REQUIREMENT	APPLIES TO	FREQUENCY
Background and reference verification	All finance roles; mandatory for cash-handling (R-09); payroll screening is an HR requirement	On appointment
Qualification certificate verification	All roles claiming a professional qualification	On appointment
Policy manual induction and attestation	All finance roles and all authority holders	On appointment, then annually
Conflict of interest declaration	All finance roles	On appointment, annually, and on change
Delegation of Authority acknowledgement	All authority holders	On appointment and on any DoA change
Continuing professional development	All qualified and part-qualified staff	Annually, per the professional body
Mandatory consecutive annual leave (minimum 5 working days)	All roles operating a financial control	Annually - duties must be covered by another person
Independence declaration	Internal Audit (R-13, R-14)	Annually and per engagement

▲ WHY MANDATORY LEAVE IS A CONTROL

Requiring a minimum block of consecutive leave, with duties genuinely performed by someone else, is one of the few controls that reliably surfaces an ongoing concealment - most schemes need continuous access to be maintained. It is a control requirement, not a wellbeing benefit, and it may not be waived for convenience.

A.3 CHARTER INDEX

CHARTER	ROLE	GRADE	PRIMARY CYCLE OWNED
R-01	Chief Financial Officer	EX	Whole framework
R-02	Finance Manager (Controller)	M3	Close, control operation, credit, payroll and write-off approval
R-03	Chief Accountant (GL & Costing)	M2	General ledger, costing, payroll accounting and interfaces
R-04	Inventory & Settlement Controller	M1	Cylinder population, counts and daily van settlement
R-05	Fixed Assets Accountant	S2	PP&E and intangibles
R-06	Accounts Payable Accountant	S2	Invoice to payment
R-07	Procurement Officer	S3	Commitment

CHARTER	ROLE	GRADE	PRIMARY CYCLE OWNED
R-08	Receivables & Credit Accountant	S3	Credit, B2B billing and receivables
R-09	Branch Accountant / Cashier	S1	Counter cash and stock
R-10	Treasury Officer	S3	Liquidity, payment release and cash verification
R-11	Tax & E-Invoicing Accountant	S3	VAT, Zakat, WHT, clearance and completeness
R-12	FP&A Analyst	S3	Budget, forecast, margin and reporting
R-13	Head of Internal Audit	M2	Independent assurance
R-14	Internal Auditor	S2	Assurance fieldwork

A.4 COMPANION DOCUMENTS

DOCUMENT	REFERENCE	ANSWERS
Finance Policy & Procedures Manual	BG-FIN-POL-001	What must be true - the mandatory rules, limits and principles
Finance SOP Manual	BG-FIN-SOP-001	How each task is performed, step by step
Roles & Responsibilities Manual	BG-FIN-ORG-001	Who does it, with what authority, competence and measures

A.5 APPROVAL AND REVISION HISTORY

VERSION	DATE	CHANGE	APPROVED BY
1.0	2026-08-08	Initial issue	Draft for CFO and Board approval

▲ BEFORE THESE CHARTERS TAKE EFFECT

Grades, reporting lines, delegated limits and KPI targets are drafted for Best Gas and must be **ratified alongside the Delegation of Authority** and aligned to the company's HR grading and remuneration framework before issue. Where headcount does not yet support a separate holder for every charter, the segregation boundaries in each role - and in R-00.4 - still apply, and any combination of roles requires a documented compensating control approved under POL-01.3.
